Sustainable development requires a holistic consideration of environmental, social and economic issues in the decision-making process and when we undertake actions & activities with the aim to support and eventually achieve the UK Government's targets of a 50% reduction in our national carbon footprint.

To manage this Measuring reduction of Dyneema Ltd's carbon footprint and report on our progress and achievements annually.

Dyneema Limited recognises the impact we have on the environment and with our subcontractors and supply chain through the whole design, construction and operational activities including considering in conjunction with our clients' beneficial amendments to the construction process to reduce the impact in the built environment over the projects whole life from source to end users, but always ensuring environmental procedures are in compliance with relevant environmental protection laws and regulations.

By operating in partnership with their clients and project stakeholders, Dyneema Ltd enables greater social value to be delivered, reduces risk and is able to enhance and protect the natural environment, minimising the impact, and the consumption of energy and natural resources.

By taking a sustainable approach Dyneema Ltd monitoring the Chain of Custody for production & procurement, this will encourage all parties to think more about the true value and costs of our activities and consider the impacts our carbon footprint is having on the environment and society as a whole.
