It is a fundamental belief held by Dyneema Ltd that has resulted in the creation of a legally safe working environment, which is embedded in our Health & Safety Quality Management Systems, and is operated in accordance with the company's working arrangements. These working arrangements are reviewed and audited externally by Alcumus to be compliant with Isoqar Certification 9001, 14001 & 45001.

Dyneema Ltd upholds that the holistic approach to the whole life of a project, will not be compromised by the application of shared Client and Subcontractor Joint Value Engineering Analyses to identify the suitability of substituting materials and methods of working, whilst preserving the safety and quality of the project as a whole.

Works will be carried out jointly with the aim to eliminate unnecessary costs and time constraints on the project.

Dyneema Ltd incorporates Designed Value Safe Engineered solutions drawn from a broad base of experience and jointly agreed upon with our business partners, always aiming to achieve both continuous improvements within the Dyneema Ltd supply chain, developing successful long-term relationships with our clients, aiming to save money and lower carbon use and increase more sustainable and environmentally friendly solutions to projects they undertake.
